

## Section F—Geographical Science

THE members of the Geographical Section combined with other sections when papers of interest to geographers were presented. Such papers are listed elsewhere under Meteorological, Botanical, Geological, Pedological, and Social Sciences.

The following geographical papers were given:

### *The Geographical Interpretation of Air Photographs*

By D. W. MCKENZIE, Victoria College.

A demonstration of some of the methods of use of air photographs, obliques and verticals, single prints and stereo pairs.

### *The Construction and Production of the New Zealand Topographical Map*

By F. L. ROSSITER, Government Printing Office.

### *Hill Country Problems*

By P. W. SMALLFIELD, Department of Agriculture.

### *A Method of Land Utilisation Survey*

By W. M. HAMILTON, D.S.I.R.

The method of land utilisation survey adopted in an exploratory survey of Whangarei County was described and the result obtainable by this method was discussed and illustrated.
